CHILE, THE PLACE TO
BUILD YOUR FUTURE

INFRAST CHILE

BUILDING THE FUTURE TOGETHER

Over the last 30 years, Chile has honed its strengths and competitiveness in order to improve public infrastructure, pioneering Public-Private Associations (PPAs) and incentives for shaping Chile's virtuous concession system, becoming an attractive & stable destination for investment.

Of the 103 contracts awarded since the concession system began, 74 concession agreements are currently in force, entailing some +US\$ 25.5 billion in committed investment. Multinationals from 16 countries are currently operating in different industries in Chile, participating in mayor infrastructure projects, including highways, airport terminals, hospitals, reservoirs, among others.

Pie de Monte Road Concession

Biobío
REGION

InvestChile 

FOREIGN INVESTMENT
PROMOTION AGENCY

NAME: *Pie de Monte Road Concession*

DESCRIPTION: The project consists of the construction of 20 km of route with a concessioned road standard, which constitutes an alternative to the current Route 160, in the section between the communes of San Pedro de la Paz and Coronel. Since these communes have experienced significant population growth in recent years and the existing road has become insufficient, generating connectivity problems, vehicle movements and road safety. The route is located on the edge of the hills, to the east of Route 160, and connects with the Puente Industrial Road Concession in the north and with the "Route 160 Concession, Coronel - Tres Pinos Section in the south. The project considers a road system with signaling, lighting, uneven crossings at its main intersections and evacuation routes in the event of eventual tsunamis, which will significantly improve connectivity in the sector and allow the current Route 160 to be given an urban character, avoiding the passage of trucks and long-distance flows through this urban road.

INVESTMENT (MMUSD\$): 251

Santiago's Southern Ringroad

Metropolitana
REGION

InvestChile 

FOREIGN INVESTMENT
PROMOTION AGENCY

NAME: *Santiago´s Southern Ringroad*

DESCRIPTION: This project generates a new East-West connection in order to connect the Southern access to Santiago, highway 5 and highway 78. This highway, which will be located in the southern area of Santiago (including the locations of Peñaflores, Calera de Tango and San Bernardo), a total length of 24 km, two way highway profile with two lanes per way, and a projected speed between 100 km/h and 120 km/h. The highway begins at Southern Access to Santiago (Route 79) nearby Maipo River and develops along the river incorporating a new connection with highway 5, continuing toward to the Del Sol highway (highway 78). It includes connections to the main routes. Among the benefits that this project will have is to improve connectivity, to become an alternative for trucks that now use the Calera de Tango route (strongly consolidated area with high lateral friction) and finally, to reduce traffic times.

La Cisterna Modal Exchange Station

Metropolitana
REGION

InvestChile

FOREIGN INVESTMENT
PROMOTION AGENCY

NAME: *La Cisterna Modal Exchange Station*

DESCRIPTION:

The La Cisterna Modal Exchange Station is a transport platform where different modes of transport converge and which especially satisfies the northern part of the metropolitan area. This project has become a key infrastructure for reducing passenger transfer and waiting times, allowing and simplifying the synchronization of frequencies of the different modes of transport; the facilitation of the incorporation to the different modes of transport through adequate information systems for users; the generation of savings associated with social costs (time of users and transport service operators); and the formation of an urban development focus that stimulates the generation of direct and indirect jobs, among others. The building has commercial and public services, which allow taking advantage of waiting times or passenger circulation, in addition to constituting an urban improvement. The station is located on the eastern side of the La Cisterna Metro Station, the terminal station for lines 2 and 4 A in the La Cisterna district.
